

GRADE-LEVEL SETS CONTAIN 150 PLUS INDIVIDUALIZED STUDENT ACTIVITIES

Brain research supports what educators already knew: no two children are alike or learn in identical ways. Our goal must be to provide an enriched environment that promotes brain growth and learning.

These individualized sets of manipulatives have features corroborated by research. They are non-threatening, enjoyable activities that actively involve students. Manipulatives stimulate multiple senses and encourage collaboration. Skills are developed in a holistic manner and sets provide adequate practice for mastery. Finally, multilevel products assure appropriate challenge and sequence.

Reading Manipulatives has a high reorder level because those who try our products see how effective the materials are and how motivated students are to work through the sets. These grade-level product groupings address an array of literacy skills suitable for each grade level. They can supplement any core reading program and be used for stations or seatwork activities.

Try them and your students will improve literacy skills, become more accountable, and cultivate a greater enjoyment of reading and writing.

Complete sets of manipulatives are ideal for differentiating instruction.

Reading Manipulatives Sourcebook shows how to teach essential literacy skills and has practical aids that teachers can use.

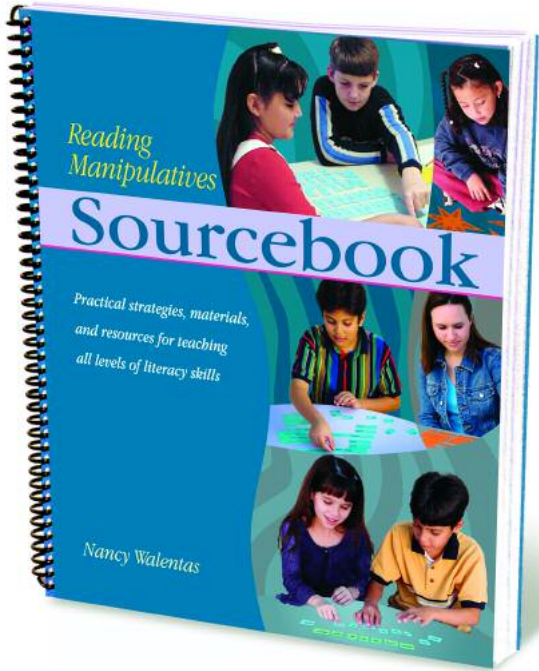

From research findings and program management through step-by-step directions and complete resources for implementation, this Sourcebook is the ultimate guide for educators.

First the Sourcebook gives rationale for reading manipulatives. Materials construction tips and strategies for managing individualized reading programs are delineated.

The final 6 sections are divided according to skills: phonemic awareness, phonics, fluency, vocabulary, comprehension, and communication. All levels and types of skills are covered, making the Sourcebook a worthwhile resource for any teacher.

After each key skill is explained, instructional steps and materials are presented. The explicit teaching suggestions and comprehensive resource lists help teachers to understand the scope of the skills. If teachers prefer not to use manipulatives, ideas can be adapted to other lessons or activities.

Multi-Grade Sets

No program provides a complete reading curriculum because children differ. Students should be offered activities suitable for their developmental levels.

The School-Wide Set contains all 62 Reading Manipulatives products and has over 1000 unique students sets. The chart on the right shows which products are included in each set.

These complete sets of manipulatives can eliminate boring worksheets and rescue teachers from daily seatwork preparation. Unlike worksheets and other random assignments, each product covers targeted skills holistically and provides adequate practice to assure mastery.

Best of all, the hands-on activities engage minds and foster an interest in reading. Students are actively involved in selecting, completing, checking, and recording their work. This increases their commitment and enjoyment, leading to greater progress.
